TREASURY DEPARTMENT, BUREAU OF STATISTICS,
Washington, D. C., November 23, 1870.

SIR: I have the honor to transmit herewith my annual report and the complete statements in detail of the Commerce and Navigation of the country for the fiscal year ended June 30, 1870, compiled in this office from the returns of the several collectors of customs, in accordance with the acts of February 10, 1820, and July 28, 1866.

Very respectfully, your obedient servant,

EDWARD YOUNG,
Chief of Bureau.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

CONTENTS.

PART I.—COMMERCE.

Table.		Page.
	ANNUAL REPORT OF THE CHIEF OF THE BUREAU OF STATISTICS	IX
1.	Imports, exports, and reëxports, by customs districts, and principal foreign countries	4–38
2.	Import entries, by countries	39–84
3.	Import entries, by customs districts	85–142
4.	Import entries, summary, (including "all other articles," and "all articles not enumerated")	143–150
5.	Exports, domestic, by countries	151–198
6.	Exports, domestic, by customs districts	199–272
7.	Exports, domestic, summary, (including "all other unmanufactured articles," and "all other manufactured articles")	273–280
8.	Reëxports, (foreign commodities,) by countries	281–312
9.	Reëxports, (foreign commodities,) by customs districts	313–344
10.	Reëxports, summary, (including "all articles not enumerated")	345–350
11.	Indirect trade	351–384
12.	Indirect trade, summary	385–386
13.	In transitu trade	387–416
14.	In transitu trade, summary	417–420
15.	Warehouse transactions, (by principal districts)	421–565
16.	Withdrawals of salt from warehouse, (for curing fish,) with estimated duties thereon	566
17.	Home consumption, by commodities, 1870	567–616
18.	Home consumption, by commodities, 1868, 1869, and 1870	617–662
19.	Home consumption, by districts, 1870	663–668
20.	American fisheries, products of	670
21.	Guano from American islands	670
22.	Lumber, &c., from Maine	670
23.	Domestic commodities, shipments from New York to San Francisco, *via* the Isthmus of Panama	671–672
24.	Domestic commodities, shipments from San Francisco to New York, *via* the Isthmus of Panama	672–673
25.	Foreign commodities, shipments from San Francisco to New York, *via* the Isthmus of Panama	673

PART II.—IMMIGRATION.

1.	Passengers arrived in the United States in 1870, by customs districts	676–677
2.	Immigrants arrived in the United States in 1870, by customs districts	678
3.	Immigrants arrived in the United States in 1870, by nationalities and customs districts	679
4.	Immigrants arrived in the United States in 1870, by occupations and customs districts	680–694
5.	Immigrants arrived in the United States in 1870, by occupations and countries	695–709
6.	Immigrants arrived in the United States in 1870, nationalities of, in detail	710
7.	Immigrants arrived in the United States in 1870, occupations of, in detail	711
8.	Passengers departed from the United States in 1870, by customs districts	712–714
9.	Immigration and emigration, 1866 to 1870, comparative	715
10.	Immigration for the 10 fiscal years ended June 30, 1870	715
11.	Immigration for the 10 calendar years ended June 30, 1870	715
12.	Alien passengers, number of, arrived in the United States from the commencement of the Government to December 31, 1869, by decades	716–717
13.	Passengers, number of, (by occupation,) arrived in the United States, from the commencement of the Government to December 31, 1869, by decades	718
14.	Alien passengers, nationalities of, arrived in the United States during the 51 years ended September 30, 1870	719–726

PART III.—NAVIGATION.

Table.		Page.
1.	Vessels, American and foreign, entered, by countries*	728, 729
2.	Vessels, American and foreign, cleared, by countries*	730, 731
3.	Vessels, American and foreign, entered, by districts*	732, 733
4.	Vessels, American and foreign, cleared, by districts*	734, 735
5.	Vessels, (ocean steamers,) American and foreign, entered, by countries*	736
6.	Vessels, (ocean steamers,) American and foreign, cleared, by countries*	737
7.	Vessels, (ocean steamers,) American and foreign, entered, by districts*	738
8.	Vessels, (ocean steamers,) American and foreign, cleared, by districts*	739
9.	Vessels, foreign, entered and cleared, by nationalities*	740–745
10.	Vessels, foreign ocean steam, entered and cleared, by nationalities*	746

PART III.—NAVIGATION.—REGISTER'S TONNAGE TABLES.

1.	Tonnage of registered, enrolled, and licensed vessels of the United States	748–755
2.	Tonnage of sailing vessels, steam vessels, barges, and canal-boats of the United States	756–762
3.	Tonnage of steam vessels of the United States	763–767
4.	Tonnage of vessels employed in the cod and mackerel fisheries of the United States	767–768
5.	Tonnage of vessels employed in the whale fisheries of the United States	768
6.	Statement showing the number and tonnage of vessels built	769–776
7.	Condensed statement showing the number and tonnage of vessels built	777–778
8.	Statement showing the number and tonnage of sailing vessels built in each State and customs district of the United States	779–785
9.	Tonnage of steam vessels built	786–789
10.	Summary statement of sailing vessels built in the United States	790
11.	Summary statement of steam vessels built in the United States	790
12.	Summary statement of barges and canal-boats built in the United States	790
13.	Balance sheet of tonnage accounts	791–792
14.	Recapitulation of the tonnage of the United States	793
15.	Description of the tonnage of the United States	793
16.	Vessels built in the States and Territories from 1815 to 1870	794
17.	Registered and enrolled tonnage of the United States from 1815 to 1870, and how employed.	795–796
18.	Tonnage, amount of, from 1789 to 1870	797–798
19.	Statement of vessels sold to foreigners, 1821 to 1870	798

*Number, tonnage, and crews.

REPORT

OF THE

CHIEF OF THE BUREAU OF STATISTICS.

TREASURY DEPARTMENT,
Bureau of Statistics, October 31, 1870.

SIR: I have the honor to submit the following report of the operations of this Bureau during the fiscal year ended June 30, 1870:

CLERICAL FORCE.

The clerical force of the Bureau at the close of the year consisted of 31 male and 8 female clerks, who were employed as follows:

Division.	Name of chief.	Number of clerks.		
		Males.	Females.	Total.
Examination	J. N. Whitney	4	1	5
Compilation	Thomas Clear	17	1	18
Tonnage and immigration	L. F. Ward	2	1	3
Registry of merchant marine	J. B. Parker	3	1	4
Revision and miscellaneous	A. W. Angerer*	2	1	3
Publication and miscellaneous	James Ryan	1	1	2
Library and files	E. F. M. Faehtz	2	.....	2

* Mr. Angerer is also translator to the Bureau.

In addition to the female clerks above designated, one has charge of the correspondence, and another is a copyist.

At the present time the clerical force consists of one chief clerk, (Mr. E. B. Elliott, who was appointed in September last,) 32 male, and 7 female clerks.

WORK OF THE BUREAU.

Owing to the peculiar and varied character of the work performed in the Bureau, it is impossible to furnish a tabular exhibit which shall indicate its nature and extent.

Examination.—In the division of examination, for example, the following work was performed:

Number of pages of letters written	4,639
Letters acknowledged, over	2,000
Acknowledgments of statements, written	3,600
Statements examined	24,000
Statements called for	400
Statements corrected by correspondence	1,000

The above figures give, however, a very inadequate conception of the critical and elaborate examination of the various monthly and quarterly

Digitized by Google

returns from the several custom-houses, or of the variety of work of a miscellaneous character accomplished in that division.

Compilation.—The same remark is applicable to the other divisions, especially to those in which the clerks are engaged in the compilation of the statistics of commerce, a labor which, in addition to the preparation of statements for members of Congress and others, cannot be fully expressed by figures.

Immigration.—The influx of alien passengers, who intend to make this country their future home, has been deemed of such vital interest to our material prosperity, that the collection and digest of the statistics of immigration have been assigned to and constitute the principal part of the duties of one division. Much care has been exercised to obtain and publish accurate statements of the age, sex, nationality, occupation, &c., of immigrants. Systematic inquiries instituted during the year have revealed the fact that large numbers come across the Canadian frontier, either directly from the British Provinces, or through them from Europe, of which movement previous reports have furnished no account; and it is to be regretted that the condition of much of the northern frontier, as to facility of crossing, and also as to the absence of means and regulations for the proper registry of persons entering our territory, is such, that full and trustworthy returns are at present impracticable.

Emigration.—The importance of securing statistics of the departure of emigrants from this country has also been recognized, and special efforts have been made to render them as complete as possible in the total absence of compulsory legislation on the subject.

Numbering vessels, tonnage, &c.—Agreeably to the requirements of the act of July 28, 1866, the second annual statement of "vessels registered, enrolled, and licensed under the laws of the United States, designating the class, name, tonnage, and place of registry," as well as the official number and signal letters awarded to each vessel, was prepared, and 5,000 copies published. The officers of customs, the commanders of United States war vessels, and the largest merchant vessels engaged in the foreign trade, as well as the principal ship-owners, have been supplied with it. A supplement has also been published, completing the record to April 22, 1870. A similar statement, showing the merchant vessels of the United States up to June 30, 1870, has been compiled, and will shortly be sent to press.

As in other departments of inquiry, accuracy and completeness have been the first considerations. Difficulties in obtaining prompt and accurate returns from the various collectors and surveyors of customs have, by persistence, been surmounted, so that the Bureau is now able to publish the condition of our merchant marine with confidence as to its correctness.

A table exhibiting the number of vessels and amount of tonnage belonging to the several customs districts of the United States on the 30th of June, 1870, geographically classified, is appended to this report. The tonnage of the country was in the aggregate 3,946,150 tons, showing a net increase over that at the close of the preceding fiscal year of only 201,831 tons.

Publications.—The monthly reports of this Bureau have, during the past year, been regularly published, and at the earliest date possible after the receipt of the returns. As they have been widely distributed, it is unnecessary to append to this report the statements which they contain relative to the trade of the country.

The publication of the annual report of Commerce and Navigation has usually been many months delayed, owing in part to the time required

Digitized by Google

to correct, by correspondence with the distant custom-houses, the many erroneous returns, and the great labor necessary to compile the numerous statements, and in part to the pressure at this period of the year of other official work at the office of the Congressional Printer. Unusual efforts have, however, been made, and are making, to have the volume for the fiscal year 1870 "submitted to Congress in a printed form on the 1st of December," in accordance with the provisions of the act under which the Bureau was established.

In this connection, the undersigned calls attention to the increased fullness and accuracy of all the publications of the Bureau. While it has been his aim to make the published statements absolutely correct, it is gratifying to know that the improvement exhibited in the closer approach to accuracy has been recognized and acknowledged.

Difficulty of obtaining accurate statistics.—Considerable difficulty has been experienced in obtaining from collectors of customs full and accurate data relative to our foreign commerce; an experience which is not surprising, when we consider the vast extent of our seacoast, the number of small custom-houses, and the fact that the utility and aim of statistical inquiries are far from being generally appreciated or understood.

The *values* of articles which pay *ad valorem* duties, and the *quantities* of those which are charged with *specific* imposts, have been given with approximate accuracy. But to supply the Bureau with the true values of both ad valorems and specifics, with the quantities, and above all with the correct values of the articles exported, was a service which many custom-house officers not only in small or remote ports, but in some of our largest cities, regarded as alike unnecessary and impracticable. The task of insisting upon such returns, and of impressing the officers with a conviction of their importance for legislative and other statistical purposes, has been no light one. Although the result of the efforts made in this direction has not been all that could be desired, yet a decided and most encouraging improvement has taken place.

USEFULNESS OF THE BUREAU FOR LEGISLATIVE AND OTHER PURPOSES.

During the last session of Congress the services of the Bureau were called into requisition to an unusual extent, and its usefulness recognized by members of both Houses of the National Legislature.

While the periodical statements of the trade of the country given in the published monthly reports of the Bureau afforded reliable data for legislative purposes, those of a miscellaneous character have also furnished a variety of information of great value. The tariffs of foreign countries, translated and published in comparison with each other and with the rates of duty in the United States, the statements of the population, agriculture, commerce, manufacturing and mining industry, cost of labor and of subsistence, of the railways, telegraphs, postal facilities, &c., of the states of the Old World, as well as of our own trade with Canada, Mexico, South America, the West India Islands, &c., have from time to time been published, and in many instances at so early a date as to anticipate the demands of Congress and the public, and to prove of practical utility as a basis and guide to legislation.

CONSULAR REPORTS.

The reports of our ministers and consuls abroad are carefully examined, and such information as appears to be of value to the commercial community selected for and published in the monthly reports of the Bureau.

Digitized by Google

These consular reports frequently afford information of great practical value, not merely to the mercantile class of the community, but to the public at large. Although some of the foreign representatives of our Government obtain, and systematically furnish, early and valuable intelligence, yet, it is to be regretted that the custom of making such communications to the Treasury Department is not general, and that our consular body in this respect is behind those of the leading commercial nations of Europe.

While it is gratifying to be able to select for publication from the very complete reports made to the British Government by its enterprising representatives in other countries, it is a source of chagrin that our Government has not contributed its full quota of information of the character desired. Yet, the hope is indulged that at no distant day the commercial reports of our legations and consuls will regularly supply full and trustworthy information of the countries to which they are accredited.

INDUSTRIAL STATISTICS.

In the report of my immediate predecessor allusion was made to the fact that the act establishing the Bureau required the officer in charge "to collect, digest, and arrange for the use of Congress, statistics of the manufactures of the United States, their localities, sources of raw materials, markets, exchanges with the producing regions of the country, transportation of products, wages, and such other conditions as are found to affect their prosperity." With the explanation, therein given by Mr. Walker, of the obstacles which prevented the accomplishment of the work above specified, obstacles which still continue, I fully concur.

As the publication of the census returns of the products of industry, giving in detail and with approximate accuracy most of the information indicated in the clause just quoted, may be expected during the ensuing year, it is deemed inexpedient to make extraordinary efforts to obtain at this time returns of like character, but which must necessarily be incomplete. As, however, the subject possesses great and increasing importance it should not be lost sight of, but in the succeeding years of this decade the earnest and persistent efforts of the Bureau should be directed to obtaining and publishing trustworthy information in regard to the extent and condition of our manufacturing industry.

In a new and sparsely settled country like ours the practical utility of the statistics of manufactures and mining is obvious. Taken at regular annual intervals, they would show the growth of these industries, and would also afford the means of testing and measuring the influence of the different circumstances and conditions in promoting or retarding such growth. The extent of each branch, the number of persons indirectly as well as directly supported by it, its relative condition as to locality, and its development in different sections of the country, its influence on agriculture and on commerce; these, and other facts, if periodically placed before legislators and the public, would not only afford data for an intelligent estimate of the value of each industry to the nation, but would indicate with tolerable clearness the measures required to furnish the conditions of general prosperity.

During the continuance of the excise tax upon manufactures, it was easy to deduce from the receipts of revenue the values of the various products—a source of information which has been cut off by the abolition of the tax. It is, however, worthy of inquiry whether returns similar to those formerly made by the assessors should not still be required for statistical purposes simply, and whether the machinery of

Digitized by Google

the Internal Revenue Bureau, with its trained and intelligent officers, might not be advantageously employed in the accomplishment of the desired object. The labor thus imposed would, it is obvious, be much lighter than when the facts were required for purposes of taxation. As the true object of the inquiry would be known, and as annoying details might be dispensed with, the information desired could, in general, be obtained with great completeness and accuracy.

As compared with the other great interests, agriculture and commerce, manufacturing industry has not received that attention, from a statistical point of view, which its importance demanded. While agriculture has been deemed worthy of the creation of a special department to mark its progress and make known its condition, and while commerce has, from the earliest period, been made the subject of statistical record, employing now, besides others in the Treasury Department, the principal part of the force of this Bureau in obtaining, examining, and compiling statistics in relation to it, manufacturing industry, it is respectfully submitted, has not received that share of careful consideration to which it is justly entitled.

TRANSPORTATION.

One of the objects contemplated in the legislation previously referred to possesses great interest, viz., that relative to the transportation of products, to attain which, extraordinary efforts should be made. It is particularly important that the movement of the crops toward the seaboard, and of merchandise to the interior, whether by rail or by canal, lake, and river, should be ascertained and made public. All the information as yet obtained on this subject relates to the movements of commerce on the northern lakes, and on the canals of the State of New York, together with such reports of transportation over railroads as their directors choose to publish. In the absence of compulsory legislation in this direction, earnest efforts will be made to obtain, from the officers of the great lines of railway, annual statements of the movement of produce and merchandise over those lines.

COST OF LABOR AND SUBSISTENCE.

The single word "wages" in the paragraph already quoted opens into a wide field of inquiry. The subject indicated has engaged the thoughtful consideration of the ablest statesmen and economists of the age, and is now occupying the attention of the more progressive governments of Europe. Impressed with its importance, and at the suggestion of the then Special Commissioner of the Revenue, the undersigned, about a year ago, prepared and transmitted to the proprietors or superintendents of mills and factories, and to the assessors of internal revenue, circulars, making inquiries as to the rates paid in different parts of the country, for factory, farm, and mechanical labor. To guide in forming an intelligent estimate of the purchasing power of wages in different localities inquiries were also instituted as to the cost of provisions, groceries, and other leading articles of consumption. From the replies obtained in response to these circulars received from every part of the country, tables have been compiled showing the rates of wages paid in the respective years 1861 and 1869: I, for factory; II, for mechanical; and III, for farm labor; also IV, giving the prices of leading articles of subsistence and domestic use, in each State and Territory, during the same years. These tables were printed at the instance of the Special Commissioner, and one thousand additional copies ordered by the Bu-

Digitized by Google

reau for distribution. The great demand for this pamphlet—a demand beyond my ability to supply—indicates the almost universal interest felt on the subject. No less than five thousand copies were requested for distribution in England, by the American Emigration Agency in London, but owing to the limited number printed, only fifty were forwarded. In acknowledging the receipt the agent states that his efforts were directed to sending to the United States the best mechanics, artizans, small farmers, laborers, &c., among which class there is naturally a strong desire for accurate information as a preliminary to emigration. In view of the benefits which may confidently be expected from a diffusion of such statistics some action by our Government would seem to be necessary.

IMMIGRATION.

Intimately connected, as it is, with the foregoing subject, and of even wider importance, immigration demands thoughtful consideration. In a country like ours, possessing rich and undeveloped resources, rendered available by the progress of internal improvements, the advent of intelligent labor has, in general, been cordially welcomed. The value of this addition to our material wealth has never been more highly prized than during the last two decades. To the influx of skilled and common labor is due in no inconsiderable measure the unexampled development of the northwestern and Pacific States.

Since the termination of the war the fertile lands of the South, heretofore under a system of servile labor but partially cultivated, present extraordinary inducements for immigration. At the present time in the northwestern, southern, and Pacific States, there exists a demand for common, and, to a more limited extent, for skilled labor, never before equalled.

With a view of affording to the immigrant such trustworthy information in regard to the several States as would guide him in making an intelligent choice of a home, the undersigned prepared and forwarded to the assessors of internal revenue in all the States west and south of Pennsylvania the following circular:

I. Can land be purchased or rented in your district suitable for small farms on favorable terms?

II. What is the price per acre of small improved farms? State what proportion has been under cultivation, how much is fenced, and the kind of buildings?

III. What is the price per acre of improved land, what proportion has been under cultivation, and how much, if any, is fenced?

IV. What is the yearly rent for small improved farms? If rented on shares, what share does the owner receive? Does the latter provide stock, implements, or seeds?

V. What are the chief articles of production, and what are the present prices of two or three of them?

VI. What is the distance to a market town, a railroad station, or a steamboat landing?

VII. What is the general quality of land, and the kind of timber?

VIII. What are the prices of ordinary farm-stock, sound and in good condition, viz: Working oxen, per pair; working horses, per pair; working mules, each; milch cows, each; sheep, each; hogs, each?

IX. For what kind of labor is there a demand?

X. What mills or factories, if any, are in operation or in progress, requiring skilled labor?

XI. Are there in your vicinity any railroads or other public works in progress, requiring common labor? If so, how far distant?

Digitized by Google

XII. If any foreign-born workmen are employed in your district please give the preponderating nationality?

XIII. Please state any advantages which your district can offer to laborers, mechanics, or small farmers? Is there much land of good quality and well watered yet unoccupied?

Replies to the above questions from the assistant assessors in nearly every part of the western, southern, and Pacific States, and the Territories, have been received, and the data classified and compiled, embodying an amount of information in regard to the advantages offered to immigrants, by each State and Territory, which, in fullness and accuracy, has not before been attained.

These compilations are now undergoing revision, and will, in connection with tables showing the cost of labor in the several States corrected to October, 1870, be submitted in a special report.

In conclusion, the undersigned takes pleasure in bearing testimony to the ability, industry, and efficiency of the officers, clerks, (both male and female,) and other employés of this Bureau.

I have the honor to be, very respectfully,

EDWARD YOUNG,
Chief of Bureau.

Hon. GEORGE S. BOUTWELL,
Secretary of the Treasury.

NOTE.—The additional and discriminating duties on the dutiable articles for 1868 are included in the calculations of the duties upon the articles on which they accrue; hence the apparent errors in some of the calculations.

NOTE.—The value of bottles containing liquor is frequently included in the value of the liquor, and only the number of bottles (without value) are returned by the collectors; hence he apparent difference in values.

*The collector of customs at New York has furnished no returns of passengers departed from that port. These figures have been obtained from the various lines of vessels carrying passengers thence to Europe and other foreign countries. The details as to sex, &c., have, in some cases, been estimated, not being shown in the returns furnished.
